PRODUCT BRIEF

Five Mac tools, one quiet app

Mole cleans, uninstalls, optimizes, analyzes, and monitors, then steps aside.

Tw93
2026.06.14

Mac maintenance scattered into five subscription apps, each with its own yearly fee. Mole folds them back into one quiet app you buy once.

One window, five tools. Mole replaces CleanMyMac, App Cleaner, Sensei, DaisyDisk, and iStat Menus.

5 tools, one app

$19 no subscription

2 Macs per license

14 days to refund

Each tool gets its own tab and a single job, and the menu bar panel shows live status without opening the window. The result is a utility you set up once and barely notice afterward.

Why Mole

- One-time $19, no yearly fee.
- Uninstalled apps go to the Trash.
- No telemetry, logs stay on your Mac.
- Native on Apple Silicon and Intel.
- Supports macOS 14 and later.

What's inside

- Clean clears caches, logs, and leftovers.
- Uninstall removes apps and their leftovers.
- Optimize runs safe maintenance tasks.
- Analyze shows where disk space really goes.
- Status tracks CPU, disk, and network live.
